EDUCATIONS

Maharaja Agrasen Institute of Technology | Delhi, India
B.Tech in Computer Science and Engineering

Aug 2024 - May 2028
CGPA : 9.1/10

PROJECTS

Argus — GitHub Issue Discovery & Recommendation Platform |  Github

- Engineered a full-stack developer platform using **Next.js, TypeScript, Node.js, PostgreSQL, and Prisma** to ingest, analyze, and recommend relevant GitHub issues based on developer skills and preferences.
- Built an **asynchronous issue-processing pipeline** using **Redis and BullMQ** for background GitHub data ingestion and AI-powered issue analysis.
- Deployed the application using **Docker, AWS EC2/ECR, and GitHub Actions**, implementing an automated **CI/CD workflow** for production deployments.

Technologies / Tools Used : Next.js, React, TypeScript, Node.js, PostgreSQL, Prisma, Redis, BullMQ, Docker, AWS, GitHub Actions

DraftlyAI — AI-Powered Chrome Extension |  Github

- Built an AI-powered Chrome Extension (Manifest V3) using **React, TypeScript, and Vite** that **detects active comment boxes** and generates contextual comment drafts for platforms such as LinkedIn, X, and blogs.
- Implemented a **content-script communication flow** between the extension popup and webpages to track the last focused comment box and inject generated text directly into **textarea** and **contenteditable** elements.
- Handled real-world dynamic web editors using **JavaScript DOM APIs** and input events, enabling reliable text insertion across different comment interfaces.

Technologies / Tools Used : Tailwind CSS, Chrome Extension APIs, JavaScript DOM APIs, Manifest V3

SKILLS

Languages : JavaScript, TypeScript, C++

Frontend : React.js, Next.js, HTML5, CSS3, Tailwind CSS, Responsive Design

Backend & Web : Node.js, Express.js, REST APIs, WebSockets, JWT Authentication

Databases : PostgreSQL, Prisma, MongoDB, Neon

DevOps & Tools : AWS (EC2, ECR), Docker, Git, GitHub, GitHub Actions, Redis, BullMQ, Vercel
